To see if there should be a 'transitional addition', in transfers of IB/SDA to contributory ESA, the DWP compares the full value of the existing award, including dependant's additions and age additions, with the ESA; in transfers of IS to income-related ESA, the DWP compares the IS applicable amount (not including amounts for children or housing costs) with the ESA applicable amount (also not including children or housing costs).

Incapacity to ESA: transfer and reassessment | CPAG
Inclusion in education: - 'to remove the bias towards inclusion' - portrayed as obstructing parents' choice; leading to unnecessary closure of special schools. - statistics in GP show 9% reduction in number of special schools (2002-10) - but no real change in the overall percentage of children attending this kind of provision.

Inclusive education, additional needs and EAL: values ...
Inclusive education values diversity and the unique contributions each student brings to the classroom. In a truly inclusive setting, every child feels safe and has a sense of belonging. Students and their parents participate in setting learning goals and take part in decisions that affect them.

This publication is intended to assist field practitioners, youth organizations and other stakeholders to identify binding constraints and viable opportunities to youth engagement in value chains that can translate into greater youth inclusion. Considering youth heterogeneity and inequalities, the youth sensitive framework for value chain analysis gives guidance to assess factors that push and pull youth into employment and entrepreneurship in value chains. The youth-sensitive value chain (YSVC) analysis is a starting point for youth-inclusive agricultural value chain development, since it identifies entry points and key actions expected to bring about the desired increase in employment and business opportunities for youth within a more attractive agriculture sector.

This report aims to identify new developments in the administration of central government that lead to better value for money: better services at lower costs for the taxpayers.

Biological diversity is considered one of today's most urgent environmental concerns, yet the term was first coined only twenty-five years ago. Why did the concept of biological diversity so quickly capture public attention and emerge as a banner issue for the environmental movement? In this book, Timothy J. Farnham explores the first time the historical roots of biological diversity, tracing the evolution of the term as well as the history of the conservation traditions that contributed to its rapid acceptance and popularity. Biological diversity is understood today as consisting of three components--species diversity, genetic diversity, and ecosystem diversity. Farnham finds that these three tiers coincided with three earlier, disparate conservation traditions that converged when the cause of preserving biological diversity was articulated. He tells the stories of these different historical foundations, recounts how the term came into the environmental lexicon, and shows how the evolution of the idea of biological diversity reflects an evolution of American attitudes toward the natural world.

European Space Agency (ESA) Handbook

In the modern world, technical issues define space policy. Missing from discussions of space policy, however, is a consideration of the political consequences of new space endeavors, particularly in the context of the European Union. This book, therefore, approaches space policy instead from the discipline of European studies and analyzes the European integration process through the lenses of political science, history, economics, and international relations. The strengths of each discipline are used to apply theoretical approaches to current issues in European space policy. Theorizing European Space Policy is the latest contribution to the growing debate on space policy and its role in the European integration process.

This book contains 17 studies by leading international scholars working on a wide range of topics in Arabic socio-linguistics, divided into four parts. The studies in Part 1 address questions of national language planning in a diglossic situation, with a particular focus on North Africa. Part 2 explores the relationship of identity and language choice in different Arabic-speaking communities living both within and outside the Arab World. Part 3 examines language choice in such diverse contexts as popular preaching, humour and Arab women's writing. Part 4 contains 5 papers in which variation, code-switching and generational language shift in the Arabic-language diaspora in Europe and the USA are the focus. The collection as a whole provides wide-ranging introduction to key areas of current research, which will be of interest to the general sociolinguist as well as the Arabic language specialist.

Documents in comprehensive detail a major environmental crisis: rapidly declining amphibian populations and the disturbing developmental problems that are increasingly prevalent within many amphibian species.

This book offers a comprehensive overview of current space exploration in terms of geopolitical and commercial aspects. Despite multiple attempts to foster commercial activities in the field of space exploration, for decades the domain largely continued to be funded and led by governments in the form of national and international programmes. However, the situation changed with the retirement of the Space Shuttle and the introduction of NASA's Commercial Orbital Transportation Services (COTS) programme, which employed an innovative procurement scheme based on competitive, performance-based, fixed-price milestones. The success of this programme marked an important milestone in the evolution of the relationship between government and industry. The growing opportunities for private actors to make more prominent contributions to space exploration also lie in the "New Space" ecosystem, a sectoral transformation characterised by a substantial increase in private investment and the emergence of commercial efforts to develop disruptive concepts and address new markets.
