There has been significant growth in the small ruminant population and production in WANA during the last three decades. However, there is a widening gap between production and consumption consumption Subject Category: Properties see more details. The production growth in the small ruminant sector is attributable to improvements in veterinary services, the provision of feed subsidies and

### **Trends in small ruminant meat production-consumption gaps ...**

The principle of economies of scale, i.e. more animal units managed per laborer can make small ruminant meat and milk production more competitive to that from cattle and buffaloes. Husbandry of small ruminants remains more labor and investment intensive per animal unit, however, unless productivity levels per animal are significantly

increased.

## **Trends in small ruminant husbandry and nutrition and ...**

Total meat production per capita seems on the verge of a continued decline. Food production is barely keeping up with population growth. Per capita cereal production is levelling off and will likely decline until farm prices increase drastically. Then less and less meat will be produced from grain and less meat will be consumed at higher cost.

In a study conducted by a government agency, it was found out that goats are multi-purpose ruminants producing 58.4% milk, 35.6% meat, and 4.3% hide, and 1.7% fiber. According to them, these small ruminants can provide the answer to improve nutritional requirements of the predominantly rural farm families scattered all over the archipelago.

Smallholder livestock keepers, fisherfolks and pastoralists are among the most vulnerable to climate change. Climate change impacts livestock directly (for example through heat stress and increased morbidity and mortality) and indirectly (for example through quality and availability of feed and forages, and animal diseases).

Written by some of the world's leading goat meat scientists, and drawing from the most recent publications in the field, this book comprehensively covers the most important areas of goat meat production. Chapters discuss the role of genetics, breeding, reproduction, and nutrition in producing good quality, profitable goat meat. The mineral, amino acid and fatty acid composition of goat meat is also addressed, along with a

credibility. More information is available at <http://www.ScholarlyEditions.com/>.

The Mediterranean area shows a great diversity of livestock systems, depending on local resources and traditions, but also on the networking space where informational resources are available for producers. During the last decades, a lot of innovations have been conceived or introduced in the Mediterranean area, allowing livestock systems to remain competitive. The book looks at two main issues: firstly, it gives an updated review on the main innovations that

## Access Free Trends In Small Ruminant Production Perspectives And Prospects

significantly changed the activities of livestock production in the Mediterranean area in the recent past. Secondly, the focus lies on the extent to which these innovations improve the efficiency, ensure the socio-cultural basis or reduce the environmental impact of livestock systems. One major finding is a new vision of innovating systems based on the distinction between regulated innovation (when aims are fixed) and innovative design (when aims are questioned). Innovations reported in the book are dealing with a set of concerns. They concern the production techniques, the work organization,

## Access Free Trends In Small Ruminant Production Perspectives And Prospects

the equipment and infrastructures, the collective features for selection, reproduction, feeding or sanitary devices. They also concern the local organization such as product labelling, new dynamics around local breeds, collective rules for supply basin or approaches of new products for new markets. More recently, some innovations focus on environmental impacts of livestock production, due to an increasing consciousness of those kinds of problems. In the final part of the book, a round table copes with a crucial question: are traditions in Mediterranean livestock activities to be

## Access Free Trends In Small Ruminant Production Perspectives And Prospects

considered an obstacle or a source of innovation? This book provides a set of updated information and knowledge useful for researchers, students, extension services and policy-makers in the field of animal science.

Goat Science and Production is the first text in several decades to present comprehensive, state of the art information on goat science and production practices from an international perspective. Including information on meat, dairy, and fiber goats, chapters are organized logically to facilitate fundamental understanding of goat

## Access Free Trends In Small Ruminant Production Perspectives And Prospects

anatomy and physiology as well as practical production applications. Goat Science and Production begins with an overview of current global production, giving the reader necessary context to enhance subsequent chapters on breed variety, genetics, animal evaluation, and functional anatomy and physiology. Later chapters expand on these concepts highlighting practical application affecting feeding practices, health and disease management, and housing requirements. Information on milk, meat, and fiber production is also addressed, along with a key chapter on formulating a business plan

## Access Free Trends In Small Ruminant Production Perspectives And Prospects

and marketing strategy. The book concludes with a thorough discussion on further needs in research and education providing direction for future progress. Goat Science and Production is globally contributed and provides an essential introduction and reference for students, researchers, outreach personnel, and producers world-wide. Key Features: Provides current information on science and production of meat, dairy, and fiber goats Reviews domestic and international production systems Discusses environmental impacts of goat production Includes coverage of economics and marketing
