'Trolls for Trump', virtual rape, fake news - social media discourse, including forms of virtual and real violence, has become a formidable, yet elusive, political force. What characterizes online vitriol? How do we understand the

Where To Download Trump Trumatic 2020r Operation Manual

narratives generated, and also address their real-world - even life-and-death - impact? How can hatred, bullying, and dehumanization on social media platforms be addressed and countered in a post-truth world? This book unpicks discourses, metaphors, media dynamics, and framing on social media, to begin to answer these questions. Written for and by cultural and media studies scholars, journalists, political philosophers, digital communication professionals, activists and advocates, this book makes the connections between theoretical approaches from cultural and media studies and practical challenges and experiences 'from the field', providing insight into a rough media landscape.

The first science fiction course in the American academy was

held in the early 1950s. In the sixty years since, science fiction has become a recognized and established literary genre with a significant and growing body of scholarship. The Cambridge History of Science Fiction is a landmark volume as the first authoritative history of the genre. Over forty contributors with diverse and complementary specialties present a history of science fiction across national and genre boundaries, and trace its intellectual and creative roots in the philosophical and fantastic narratives of the ancient past. Science fiction as a literary genre is the central focus of the volume, but fundamental to its story is its non-literary cultural manifestations and influence. Coverage thus includes transmedia manifestations as an integral part of the genre's history, including not only short stories and novels,

The 2020 UNODC Global Report on Trafficking in Persons is the fifth of its kind mandated by the General Assembly through the 2010 United Nations Global Plan of Action to Combat Trafficking in Persons. It covers more than 130 countries and provides an overview of patterns and flows of trafficking in persons at global, regional and national levels, based primarily on trafficking cases detected between 2017 and 2019. As UNODC has been systematically collecting data on trafficking in persons for more than a decade, trend information is presented for a broad range of indicators.

There has been much confusion about corporate profits. As a result, there has been lots of sloppy analysis and misinformed discussion of such important issues as the central role of profits in economic growth, the trend of profits, the corporate tax rate, the profit margin, profits' share of national income, and corporate share buybacks. The confusion has played into the hands of progressives, who claim that the profit motive results in income and wealth inequality. As I will show in this study, their narrative of the relationship between profits and prosperity is wrong and misleadingly pessimistic. Market-driven profit is the source of widespread prosperity, not its nemesis.

The emergence of COVID-19 has raised urgent and important questions about the role of Canadian intelligence and national security within a global health crisis. Some argue that the effects of COVID-19 on Canada represent an intelligence failure, or a failure of early warning. Others argue that the role of intelligence and national security in matters of health is--and should remain--limited. At the same time, traditional security threats have rapidly evolved, themselves impacted and influenced by the global pandemic. Stress Tested brings together leading experts to examine the role of Canada's national security and intelligence community in anticipating, responding to, and managing a global public welfare emergency. This interdisciplinary collection offers a clear-eyed view of successes, failures, and

lessons learned in Canada's pandemic response. Addressing topics including supply chain disruptions, infrastructure security, the ethics of surveillance within the context of pandemic response, the threats and potential threats of digital misinformation and fringe beliefs, and the challenges of maintaining security and intelligence operations during an ongoing pandemic, Stress Tested is essential reading for anyone interested in the lasting impacts of the COVID-19 pandemic.

focuses on the rapidly changing rhetoric coloring American politics. An increasingly polarized electorate combined with advances in technology have led to a combative and pitched rhetoric through more and more outlets. Each chapter is interdisciplinary in nature, drawing on communication studies, political science, history, and other fields. Using the extensive collection of the C-SPAN Video Library, chapters cover the highly visible Thomas and Kavanaugh judicial nomination hearings as well as the ongoing debate around impeachment. Other pieces focus on the rhetoric of the 2008 Wall Street crisis, presidential campaign announcements, White House press conferences, floor time by women in the House of Representatives, the use of Twitter by legislators, and the puzzle of zero population growth. Collectively, they

paint a picture of how Congress and the president approach the broad topic of political rhetoric using C-SPAN video as the basis for their research. The C-SPAN Video Library is unique because there is no other research collection that is based on video research of contemporary politics.

Methodologically distinctive, much of the research uses new techniques to analyze video, text, and spoken words of political leaders. No other book examines such a wide range of topics--from immigration to climate change to race relations--using video as the basis for research.

captioning, and other enhanced online features provide researchers, policy analysts, students, teachers, and public officials with an unparalleled chronological and internally cross-referenced record for deeper study. The Year in C-SPAN Archives Research presents the finest interdisciplinary research utilizing tools of the C-SPAN Video Library. Each volume highlights recent scholarship and comprises leading experts and emerging voices in political science, journalism, psychology, computer science, communication, and a variety of other disciplines. Each section within each volume includes responses from expert discussants. Developed in partnership with the Brian Lamb School of Communication and with support from the C-SPAN Education Foundation, C-SPAN Insights is guided by the ideal that all experimental
