<p>Since its introduction in 1979, CHEAPO, a computer based economic analysis program, has allowed users of the Stand Prognosis Model to evaluate silvicultural alternatives from an economic point of view. Subsequent modifications to the Prognosis Model have rendered CHEAPO obsolete. This users guide covers a new computer model, CHEAPO II, which is compatible with version 5.1 of the Prognosis Model and expands its economic analysis capabilities.</p>

<p>Through the use of primary source documents, readers can learn about key opinions and legislation in the important field of animal rights and welfare—a current and highly relevant topic. • Provides extensive coverage of a variety of topics, ranging from historic events and information to the latest developments in the field of animal rights and welfare • Presents an impartial, balanced representation of various political/moral perspectives on the issues in animals rights and welfare • Offers primary source material—such as the Wild Horse Annie Act of 1959—that enables readers to review the exact text of important legislation • Gives readers the resources to draw their own informed conclusions by providing opposing perspectives on often-polarizing animal rights and welfare issues, such as the morality of using animals for industrial and medical research, restoring wolves to former hunting grounds, and keeping highly intelligent dolphins and Orcas in captivity • Includes supplemental material that provides additional context</p>

<p>This thought-provoking reference work explores the evolution of America's heated abortion debate in a selection of over 40 primary documents from the 19th century to the present day. The guide includes not only key laws and court cases that have determined abortion policy, but also political speeches, medical essays, theological writings, newspaper advertisements, magazine articles, and popular books that offer insight into America's changing attitudes towards women, race, the medical field, and the role of government in its citizens' personal lives. Each document is preceded by an introduction and is followed by analysis to help readers understand its significance and historical context. Today abortion is America's most contentious political and religious rallying point. Yet 150 years ago it was a virtual non-issue, quietly performed for centuries by women and mid-wives. What changed? This thought-provoking reference work explores the evolution of America's abortion debate in a balanced selection of over 40 primary documents by doctors, feminists, religious leaders, politicians, extremists, and judges from the 19th century to the present day. This guide not only examines the key laws and court cases, like Roe v. Wade and the Partial Birth Abortion Ban, that have determined abortion policy, but offers insight into America's changing attitudes towards women, race, the medical field, and the role of government in its citizens' personal lives. Memoirs of early abortion providers, excerpts from popular women's self-help books, the complete text of Pope Paul VI's Humanae Vitae, and personal writings from key liberal and conservative figures on both sides of the debate provide a more complete picture of an issue that is deeply personal, deeply divisive, and anything but clear-cut. A straightforward and accessible book, ideal for both students and general readers looking to expand their understanding of one of the most complicated, and still unresolved, issues of our day. Each excerpt is preceded by a brief explanation of its significance and followed by author analysis to help readers understand its implications and the historical context in which it is written. Readers gain direct access to America's most important legal papers and transcripts on abortion, complimented by a well rounded view of the public beliefs and sentiments that have fueled abortion debates. Suggestions for further reading conclude each chapter, perfect for research or to guide interested readers in their search for material. The front matter includes a Timeline of major events in abortion history, and the back matter, offers a Bibliography of 50 titles on abortion and over 30 Web links.</p>

There are three park systems in Saskatchewan: Regional, Provincial, and National. All provide wonderful recreational opportunities to virtually every community in the province.

This book is based on an in-depth filmed conversation between Howard Burton and James Robert Brown, Emeritus Professor of Philosophy at the University of Toronto. This wide-ranging conversation addresses a central theme in current philosophy: Platonism vs. Naturalism and provides accounts of both approaches to mathematics. The Platonist-Naturalist debate over mathematics is explored in a comprehensive fashion and also sheds light on non-mathematical aspects of a dispute that is central to contemporary philosophy. Thought experiments stand as a fascinating challenge to the necessity of data in the empirical sciences. Are these experiments, conducted uniquely in our imagination, simply rhetorical devices or communication tools or are they an essential part of scientific practice? This book also surveys the current state of this debate and explores new avenues of research into the epistemology of thought experiments. This carefully-edited book includes an introduction, Mathematical Metaphysics, and questions for discussion at the end of each chapter: I. Introducing Platonism - An explanation for what mathematics really is II. Attacks and Defenses - Platonism under fire III. Seeing With the Mind's Eye - Two revealing examples IV. Platonism Bounces Back - From quantum physics to the mind-body problem V. The Philosophical Life - On sociological divides and being a team player About Ideas Roadshow Conversations: This book is part of an expanding series of 100+ Ideas Roadshow conversations, each one presenting a wealth of candid insights from a leading expert through a focused yet informal setting to give non-specialists a uniquely accessible window into frontline research and scholarship that wouldn't otherwise be encountered through standard lectures and textbooks.
