In this book, Dr. Li and his author team plan to emphasize why mouse models are useful in vivo systems for understanding disease mechanisms and developing therapeutic strategies in blood cancers. The authors do not intend to cover all types of blood cancers; instead, they will focus on some major ones such as leukemias and lymphomas. However, the authors will try to cover as much as they can the cancer types and point out that many blood cancers need to be studied in mouse disease models although they are still not available at present. A major focus in the book will be to show what we can or cannot learn from mouse disease models and to also show the critical contributions of mouse models in therapeutic drug development.

This guide presents information on planning and managing microfilming projects, incorporating co-operative programmes, service bureaux and the impact of automation for library staff with deteriorating collections.

“ The methods change, but the message stays the same. ” This saying is the guiding light for faithful Christians in a changing world. But author Shane Hipps reveals the error in this thinking. Instead he demonstrates how changing the methods always changes the message. He shows us the hidden power of technology to shape our faith in unexpected ways.

Readers learn what data to collect, how to analyze it, and how to act upon it. They will learn how to develop everything from an executive level dashboard and ROI measurement to a deep analysis of a specific term or word to see how it can improve overall ranking.

Withdrawn Philadelphia attorney Landrien Moriset has spent most of her life emotionally closed off from everyone around her, and that ' s just how she likes it. With a nice little apartment, no lack of lovers, and a caring police officer brother, she has few complaints. She ' s living by her own rules, and that's all that matters. But everything changes when her mother ' s sudden death calls her back to the family home in Phoenixville, and she is forced to confront the ghosts of her painful childhood. From a mysterious locket to a dusty old photo album and a box of diaries, what Landrien discovers in the family home threatens to turn her carefully crafted life upside down. Taking the reader on a journey from snowy Pennsylvania to backwoods Arkansas, Landrien Moriset is Berneta L. Haynes ' quiet, suspenseful debut novel about love, secrets, survival, and sacrifice.

In order to face new challenges and unique situations in turfgrass management, students need to understand why specific management practices work and how to adjust them based on plants' requirements. Explaining the physiological needs of turfgrass plants, this advanced textbook outlines the management techniques that help supply those needs. Chapters discuss a range of practices and methods to cope with stress under both normal and less than optimum conditions, providing the decision making tools for improvement based on changing environmental conditions. This book presents a unique perspective of both science and practical management principles that will be applicable to all turfgrass sectors.

This book is for developers who are already proficient in programming and capable of designing systems using traditional databases, but are new to Redis. It is assumed that you understand the basics of Redis and are familiar with the various data structures. You are also expected to be proficient in one or more programming languages through which you want to use Redis.

In 1958 Detroit, pregnant Grace, best friend Julia, and stylish Malina are terror-stricken by the disappearance of a childlike neighbor under their care whose fate reveals sinister elements in their community.

Bestselling author Simon Blackburn tackles the key questions in philosophy--and provides easy-to-understand and enlightening answers. In Big Questions: Philosophy, bestselling author Simon Blackburn addresses the 20 essential questions: What is the meaning of life? Am I free? Why is there something and not nothing? What do we really know? Is there such a thing as society? Can machines think? What is time? How can I deceive myself? Why be good? What fills up space? Can we truly understand each other? Why do things keep on keeping on? Are we rational? What am I? What are my rights? Is truth relative? Do we need God? What is human nature? What is beauty? Is death to be feared?
