--

Fred Saberhagen is known for his series of ten Dracula novels. Less well known are his three short stories featuring vampires and Dracula. The stories have appeared in various anthologies and collections. Here they are gathered in one place for your enjoyment. "A Drop Of Something Special In The Blood" tells the possible story of how Bram Stoker came to write his classic tale of Dracula. Of course there are vampires. "Box Number Fifty" refers to one of the boxes owned by a mysterious immigrant arriving in Victorian England from Transylvania. "From The Tree Of Time" pairs Dracula with the world's greatest detective Sherlock Holmes in an effort to save a Victorian woman's honor.

The "wrenching but inspiring" true story of a tragic medical mistake that turned a grieving mother into a national advocate (The Wall Street Journal). Sorrel King was a young mother of four when her eighteen-month-old daughter was badly burned by a faulty water heater in the family's new home. Taken to the world-renowned Johns Hopkins Hospital, Josie made a remarkable recovery. But as she was preparing to leave, the hospital's system of communication broke down and Josie was given a fatal shot of methadone, sending her into cardiac arrest. Within forty-eight hours, the King family went from planning a homecoming to planning a funeral. Dizzy with grief, falling into deep depression, and close to ending her marriage, Sorrel slowly pulled herself and her life back together. Accepting Hopkins' settlement, she and her husband established the Josie King Foundation. They began to implement basic programs in hospitals emphasizing communication between patients, family, and medical staff—programs like Family-Activated Rapid Response Teams, which are now in place in hospitals around the country. Today Sorrel and the work of the foundation have had a tremendous impact on health-care providers, making medical care safer for all of us, and earning Sorrel a well-deserved reputation as one of the leading voices in patient safety. "I cried . . . I cheered" at this account of one woman's unlikely path from full-time mom to nationally renowned patient advocate (Ann Hood). "Part indictment, part celebration, part catharsis" Josie's Story is the startling, moving, and inspirational chronicle of how a mother—and her unforgettable daughter—are transforming the face of American medicine (Richmond Times-Dispatch).

Yasmin's handy Bulls*%t Detection Kit.
The #1 clinical reference on pediatric and adolescent gynecology is now in its updated Fifth Edition. Written by experts from The Children's Hospital in Boston and other leading medical centers, this handbook presents contemporary approaches to diagnosis and medical and surgical management of gynecologic problems in infants, children and adolescents. This edition features cutting-edge information on urology and complementary and alternative medicine and expanded coverage of surgical techniques for correcting structural abnormalities of the reproductive tract. More than 400 illustrations—including 8 pages of full-color plates—complement the text. The book also includes outstanding algorithms and tables and abundant case examples.

"During the past decade, the first, second and 3rd editions of the NMS Review for USMLE Step 2 have served as important adjuncts for students preparing to take the USMLE Step 2 Examination. This the 4th edition of NMS Review for USMLE Step 2 CK reflects the fact that it only relates to the CK (clinical knowledge) component of the current two-part Step 2 Examination. In providing this knowledge, it continues the traditions of relevance and excellence established by the previous editions"--Provided by publisher.
