For the first time in one volume, Phil Edmonston, Canada ' s automotive “ Dr. Phil, ” covers all used vehicles, packing this guide with insider tips to help the consumer make the safest and cheapest choice possible from cars and trucks of the past 25 years.

"The automotive maven and former Member of Parliament might be the most trusted man in Canada, an inverse relationship to the people

he writes about." – The Globe and Mail Lemon-Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. This brand-new edition of the bestselling guide contains updated information on secret service bulletins that can save you money. Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada's automotive "Dr. Phil" for over 40 years, Edmonston pulls no punches. His Lemon-Aid is more potent and provocative than ever.

This compendium of everything that's new in cars and trucks is packed with feedback from Canadian drivers, insider tips, internal service bulletins, and confidential memos to help the consumer select what's safe, reliable, and fuel-frugal.

**Welding and Joining of Advanced High Strength Steels (AHSS):** The Automotive Industry discusses the ways advanced high strength steels (AHSS) are key to weight reduction in sectors such as automotive engineering. It includes a discussion on how welding can alter the microstructure in the heat affected zone, producing either excessive hardening or softening, and how these local changes create potential weaknesses that can lead to failure. This text reviews the range of welding and other joining technologies for AHSS and how they can be best used to maximize the potential of AHSS. Reviews the properties and manufacturing techniques of advanced high strength steels (AHSS) Examines welding processes, performance, and fatigue in AHSS Focuses on AHSS welding and joining within the automotive industry

This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

This volume contains articles from leading analysts and researchers on sustainable transportation, who provide critical reflections on how automobile-related climate policies have evolved up to now in Europe and around the world, in view of the widely recognized need to substantially curb global emissions of greenhouse gases in the coming decades. Authors describe the policies which have been most effective, outline their economic and social implications, present success stories while critically reviewing less successful examples, and suggest strategies to decarbonize passenger transportation on a global scale.

Mai come nell'ultimo periodo il mercato delle quattro e delle due ruote è stato tanto in fermento da determinare una vera e propria metamorfosi delle reti distributive. Calo vertiginoso della domanda, inasprimento della concorrenza, aumento degli standard quantitativi e qualitativi richiesti dalle Case produttrici, maggiore ricorso a fonti di finanziamento esterne, diminuzione della redditività, sono solo alcuni dei tanti nuovi mostri sperimentati da chi vende e ripara auto e moto. Questa evoluzione rende necessaria la conoscenza di tecniche di gestione tipiche di un settore in cui la passione non può più pilotare il destino delle aziende. Questo primo manuale di Dealership Management italiano, dedicato al settore automotive, spiega a fondo tutti gli aspetti del mercato e dell'organizzazione aziendale. Attraverso esempi concreti e dalla viva voce dei top manager delle più importanti Case italiane di auto e moto, offre importanti soluzioni a molti dei problemi emersi negli ultimi anni e le mosse per anticipare la ripresa. La prefazione del libro è un'intervista a Giuseppe Volpato (professore ordinario di Economia e gestione delle imprese presso l'Università Ca' Foscari di Venezia, membro dello Steering Committee del Groupe d'Étude et Recherche Permanent dans l'Industrie et les Salariés de l'Automobile di Parigi e Senior Adviser dell'International Car Distribution Programme di Birmingham), che ci aiuta a decifrare con rigore scientifico l'evoluzione in atto nel business model della distribuzione automotive.
