When a self-driving car hits an extra on set and a lawsuit is filed, Andy sets out to bankrupt his own production company by making a movie about his weird and romantic life of infidelity. With his wife Anna, and her best friend, he embarks on a location-scouting trip to Desolation Sound, but the trip takes a disastrous turn when the friend goes missing and they have to call in search and rescue. Not wanting the search to expose his affair with his wife ' s best friend, Andy steals a memory card out of her camera. A memory card with evidence of the affair. But Andy ' s not as discreet as he thinks and the memory card is stolen from him. With the disastrous support of his best friend, Will, Andy makes a series of bad decisions in an attempt to recover it, leading him further from Anna than ever before. Will their marriage finally reach its breaking point?

Waterproof and Water Repellent Textiles and Clothing provides systematic coverage of the key types of finishes and high performance materials, from conventional wax and silicone, through controversial, but widely used fluoropolymers and advanced techniques, such as atmospheric plasma deposition and sol-gel technology. The book is an essential resource for all those engaged in garment development, production and finishing, and for academics engaged in research into apparel technology and textile science. Rapid innovation in this field is driving new performance demands in many areas, including the sporting and military sectors. However, another innovation driver is the regulatory framework in the USA, Europe and globally, addressing both health concerns (e.g. with PFOS / PFOA) and environmental impacts (e.g. C8 fluorocarbon finishes). Both of these aspects are fully covered, along with the replacement materials / technologies currently available and under development. In addition, oleophobic and multifunctional coatings are discussed, as are aspects of performance, testing and applications in sportswear, protective clothing, and footwear. Introduces innovative materials and technologies, exploring their current and potential use across different sectors Provides expert guidance on the health and environmental aspects of key waterproof materials and coatings and their associated regulations Demystifies testing processes and design principles

A magical story of love and the isolation that defines the modern condition - Andrew Kaufman pulls off the near impossible and creates a wholly original allegorical tale that is both emotionally resonant and outlandishly fun. Rebecca Reynolds is a young woman with a most unusual and inconvenient problem: no matter how hard she tries, she can't stop her emotions from escaping her body and entering the world around her. Luckily she's developed a nifty way to trap and store her powerful emotions in personal objects - but how many shoeboxes can a girl fill before she feels crushed by her past? Three events force Rebecca to change her ways: the unannounced departure of her husband, Stewart; the sudden death of Lisa, her musician sister; and, while on her way to Lisa's funeral, a near-crash with what appears to be a giant frogwoman recklessly speeding in a Honda Civic. Meanwhile, Lisa's inconsolable husband skips the funeral and flies to Winnipeg where he begins a bizarre journey that strips him of everything before he can begin to see a way through his grief... all with the help of a woman who calls herself God.
