An historical and political discussion of Korea and an examination of the causes of the fighting.

A generation before Vietnam, the war for Korea raged. It was as rough and dirty a war as has ever been fought—a war small in history, but very large to the men who waged it. . . . In the Korean War, one group above all others distinguished itself, a small elite band who volunteered for action behind enemy lines. They were the men of the U. S. Army's legendary Rangers. They succeeded in making the first combat jump in Ranger

history, destroying enemy headquarters, and inflicting the first defeat on Communist Chinese forces while suffering a disproportionate number of casualties. This is their story, told here for the first time—based on military records, interviews with survivors, and the author's personal experiences as an American Ranger in the Korean War.

missionaries, Americans were not interested in Korea or considered it important in the scheme of things. Many did not know Korea had existed as an independent kingdom for centuries and others thought Korea might be a part of China or Japan. Nationalism, geopolitics, and imperialism were the major determinants of international events in the late nineteenth and early twentieth century. Greed and racism were the prime motivators of imperialism and non-White societies of the world were the victims. Korea was one of many countries that was invaded and made a "sphere of influence." With the support of America

and Britain, Japan destroyed Korea's traditional national identity and made Korea a colony in the Japanese Empire. It was the perfect example of how imperialism profoundly affected the social, economic, and political life of countries subjugated by imperialist powers. After World War II, Korea was not granted independence because the Americans did not believe Koreans were capable of self-government. Korea was divided into two military occupation zones, resulting in the creation of a Russian and an American satellite state. In an effort to unite Korea, North Korea invaded South Korea. The U.S.,

China, and the two Korean states fought a meaningless war and Korea remains divided. Who are the Koreans? Why are there two Koreas? What is Korea's national identity? What role does imperialism and racism play in the destruction of national identities? Hopefully, this brief history of Korea and the Imperialists will provide some answers.

during the development of its modernization - from about 1800 to the present - this book emphasizes the character, beliefs, and sentiments of the people and the personalities and careers of their pivotal leaders. The history narrates the struggles of Koreans to resist imperialistic pressures exerted against the "strategic heart of northeast Asia" by Japan, China, Russia, and England. It also examines, in particular detail, the sometimes helpful and sometimes hurtful role of the United States - Korea's most influential and most reluctant ally. What is Korea, who are Koreans, and what are

they really like? South Korea has set the pattern for emergence from poverty to prosperity, from endemic disease to healthfulness, and from general illiteracy to universal education. A 1992 study by a U.S. testing service found that elementary students of South Korea ranked first in both science and mathematics among the ten most "advanced nations" of the world. These achievements, not accidental, account for the success of Korea, which may be called a modern miracle. During the past two hundred years of Korea's modernization period, the Korean people have displayed strength and

courage by preserving their nationalism and special culture in the face of surrounding and stronger nations. For instance, when Japan colonized Korea from 1910 to 1945 and attempted to "Japanize" its conquest, the Korean people held fast to their own traditions. Indeed, against all imperialistic enemies, Korea sought to protect itself by becoming a tightly isolated Hermit Kingdom. In the years of Japanese rule of Korea, the Indian poet Tagore wrote, "Korea, once a bright light in the golden age of Asia, if it is to be relit, will be again the light of the East." His words were prophetic. Not only

has Korea distinguished itself in the area of social reform; it has emerged as a fountainhead of Asian culture. The inspirational leadership of ethical philosophers and the village Silhak movement have met the modernizing influence of Christian missionaries and Western commercialization to guide the Korean people toward informed, self-reliant democracy. In *A History of the Korean People in Modern Times*, Robert T. Oliver vividly chronicles the full scope and progress of Korea - from its near-primitive beginnings to present-day prosperity. The pages of the volume are alive
