do that makes a difference. The solution? It isn't science, politics, or activism. It's smarter economics. The hope of mankind, and indeed of every living thing on the planet, is now in the hands of the dismal science. Fortunately, we've been there before. Economists helped crack the acid rain problem in the 1990's (admittedly with a strong assist from a phalanx of lawyers and activists). Economists have helped get lead out of our gas, and they can explain why lobsters haven't disappeared off the coast of New England but tuna is on the verge of extinction. More disquietingly, they can take the lessons of the financial crisis and model with greater accuracy than anyone else the likelihood of environmental catastrophe, and they can help save us from global warming, if only we let them.

Uncover all the mysteries of life and how you fit into it.

Did you know that there the Earth is home to so many kinds of landforms? This exciting book will take you to the deepest valleys and the highest mountains in just a few minutes. Here, you will learn about the differences between hill and mountains, and possibly figure out what landform you love best. Grab a copy today!

'The most effective ways for individuals to reduce their carbon footprint' INews Climate Change researcher, Seth Wynes, sets out in the simplest terms how you can make a real and positive impact. Make changes at home, at work, to how you shop, eat, live - start by finding one thing
