clear graphics will take you step by step through 12 basic projects, none of which should take more than half an hour. Using alligator clips to connect components, you see and hear immediate results. The hands-on approach is fun and intriguing, especially for family members exploring the projects together. The 12 experiments will introduce you to switches, resistors, capacitors, transistors, phototransistors, LEDs, audio transducers, and a silicon chip. You'll even learn how to read schematics by comparing them with the circuits that you build. No prior knowledge is required, and no math is involved. You learn by seeing, hearing, and touching. By the end of Experiment 12, you may be eager to move on to a more detailed book. Easy Electronics will function perfectly as a prequel to the same author's bestseller, *Make: Electronics*. All the components listed in the book are inexpensive and readily available from online sellers. A very affordable kit has been developed in conjunction with the book to eliminate the chore of shopping for separate parts. A QR code inside the book will take you to the vendor's web site. Concepts include: Transistor as a switch or an amplifier Phototransistor to function as an alarm Capacitor to store and release electricity Transducer to create sounds from a timer Resistor codes A miniature light bulb to display voltage The inner workings of a switch Using batteries and resistors in series and parallel Creating sounds by the pressure of your finger Making a matchbox that beeps when you touch it And more. Grab your copy and start experimenting!

and with as little jargon as possible. Just how secure is your computer right now? You probably don't really know. Computers and the Internet have revolutionized the modern world, but if you're like most people, you have no clue how these things work and don't know the real threats. Protecting your computer is like defending a medieval castle. While moats, walls, drawbridges, and castle guards can be effective, you'd go broke trying to build something dragon-proof. This book is not about protecting yourself from a targeted attack by the NSA; it's about armoring yourself against common hackers and mass surveillance. There are dozens of no-brainer things we all should be doing to protect our computers and safeguard our data—just like wearing a seat belt, installing smoke alarms, and putting on sunscreen. Author Carey Parker has structured this book to give you maximum benefit with minimum effort. If you just want to know what to do, every chapter has a complete checklist with step-by-step instructions and pictures. The book contains more than 150 tips to make you and your family safer. It includes:

- Added steps for Windows 10 (Spring 2018) and Mac OS X High Sierra
- Expanded coverage on mobile device safety
- Expanded coverage on safety for kids online
- More than 150 tips with complete step-by-step instructions and pictures
- What You'll Learn
- Solve your password problems once and for all
- Browse the web safely and with confidence
- Block online tracking and dangerous ads
- Choose the right antivirus software for you
- Send files and messages securely
- Set up secure home networking
- Conduct secure shopping and banking online
- Lock down social media accounts
- Create automated backups of all your devices

This book presents the peer-reviewed proceedings of the 5th International Conference on Intelligent Computing and Applications (ICICA 2019), held in Ghaziabad, India, on December 6–8, 2019. The contributions reflect the latest research on advanced computational methodologies such as neural networks, fuzzy systems, evolutionary algorithms, hybrid intelligent systems, uncertain reasoning techniques, and other machine learning methods and their applications to decision-making and problem-solving in mobile and wireless communication networks.

Follow Eric Olafson's epic adventure through a multi cultural mega civilization as he goes deep undercover in the 51st century as Black Velvet - a female pirate captain of a mysterious background. Thrust into the life of a starship captain, Eric Olafson is now the commanding officer of the famous spacecraft, the USS Tigershark. On their mission to hunt pirates and criminals, Eric and his unusual crew are sent into Freespace, disguised as the very outlaws they are chasing. Eric reveals himself as Black Velvet, a gorgeous female with long blonde hair, a killer body, and a reputation that stirs fear throughout the galaxies in civilians, space pirates and criminals alike. Eric is still oblivious to the fact that he is destined to play a central role in an ancient conflict of cosmic proportions, but something is stirring. "This is what Sci-Fi is all about.
