Every manager desires to have great teams around them collaborating together and running with the mission. Unfortunately, most of these teams have been built around decades-old ideas and practices made popular by companies that either no longer exist or haven't been relevant in years. But a new generation of teams has learned to do things differently--things like hiring the right person instead of the best person; focusing on one priority while leaving

## Online Library Xtreme Cut 290 The Right Coolant Makes A Big Difference

room to explore new ideas; creating an environment where people are comfortable dealing with the uncomfortable; and maximizing profit by not making it top priority. And this revitalized look at how teams should work in today's business is driving real growth in some of the world's most innovative firms. In *Extreme Teams*, sneak peeks into top companies and examine the teamwork experiments powering their results, including how:

- Pixar's teams use constant feedback and debate to transform initially flawed films into billion-dollar hits
- A culture of radical "freedom and responsibility" helps Netflix execute on the next big thing
- Whole Food's super-autonomous teams embrace hard metrics and friendly competition to drive performance
- Zappos fuels the weirdness and fun that sustains its success
- And much more!

From marketing to design to technology to product demand, everything has changed in

## Online Library Xtreme Cut 290 The Right Coolant Makes A Big Difference

business and will continue to do so. Why shouldn't the teams carrying out these changes undergo their own upgrades?

The first edition of "Extreme Programming Explained" is a classic. It won awards for its then-radical ideas for improving small-team development, such as having developers write automated tests for their own code and having the whole team plan weekly. Much has changed in five years. This completely rewritten second edition expands the scope of XP to teams of any size by suggesting a program of continuous improvement based on: five core values consistent with excellence in software development; eleven principles for putting those values into action; and, thirteen primary and eleven corollary practices to help you push development past its current business and technical limitations. Whether you have a

## Online Library Xtreme Cut 290 The Right Coolant Makes A Big Difference

small team that is already closely aligned with your customers or a large team in a gigantic or multinational organization, you will find in these pages a wealth of ideas to challenge, inspire, and encourage you and your team members to substantially improve your software development.

Offers an inside look at the politics and science surrounding global warming; efforts by the oil, gas, and automobile industries to refute environmental research findings; and international attempts to pass environmental legislation.

Brimming with over 100 "recipes" for getting down to business and actually doing XP, the Java Extreme Programming Cookbook doesn't try to "sell" you on XP; it succinctly documents the most

## Online Library Xtreme Cut 290 The Right Coolant Makes A Big Difference

important features of popular open source tools for XP in Java--including Ant, Junit, Http'nit, Cactus, Tomcat, XDoclet--and then digs right in, providing recipes for implementing the tools in real-world environments.

Are all film stars linked to Kevin Bacon? Why do the stock markets rise and fall sharply on the strength of a vague rumour? How does gossip spread so quickly? Are we all related through six degrees of separation? There is a growing awareness of the complex networks that pervade modern society. We see them in the rapid growth of the Internet, the ease of global communication, the swift spread of news and information, and in the way epidemics and financial crises develop with startling speed and intensity. This introductory book on the new science of networks takes an interdisciplinary approach,

## Online Library Xtreme Cut 290 The Right Coolant Makes A Big Difference

using economics, sociology, computing, information science and applied mathematics to address fundamental questions about the links that connect us, and the ways that our decisions can have consequences for others.

Today's new breed, eXtreme projects are different. They feature high speed, high change, high complexity, high risk, and high stress. While traditional projects follow the classic model of ready, aim, fire, eXtreme project managers succeed by shooting the gun and then redirecting the bullet while not losing sight of their moving target. eXtreme Project Management provides a practical guide for leaders working under high risk and high pressure while

## Online Library Xtreme Cut 290 The Right Coolant Makes A Big Difference

producing the desired bottom-line results. Based on Doug DeCarlo's extensive experience in working with more than 250 project teams, his eXtreme project management model is built around an integrated set of principles, values, skills, tools, and practices proven to consistently work under conditions of rapid change and uncertainty. eXtreme project management is based on the premise that you don't manage the unknown the same way you manage the known. It's a people-centric approach to high performance that makes quality of life a fundamental part of the project venture.

MATLAB for Neuroscientists serves as the only complete study manual and teaching resource for MATLAB, the globally accepted standard for scientific computing, in the neurosciences and

## Online Library Xtreme Cut 290 The Right Coolant Makes A Big Difference

psychology. This unique introduction can be used to learn the entire empirical and experimental process (including stimulus generation, experimental control, data collection, data analysis, modeling, and more), and the 2nd Edition continues to ensure that a wide variety of computational problems can be addressed in a single programming environment. This updated edition features additional material on the creation of visual stimuli, advanced psychophysics, analysis of LFP data, choice probabilities, synchrony, and advanced spectral analysis. Users at a variety of levels—advanced undergraduates, beginning graduate students, and researchers looking to modernize their skills—will learn to design and implement their own analytical tools, and gain the fluency required to meet the computational needs of neuroscience practitioners. The first complete volume on MATLAB focusing on neuroscience and

## Online Library Xtreme Cut 290 The Right Coolant Makes A Big Difference

psychology applications Problem-based approach with many examples from neuroscience and cognitive psychology using real data Illustrated in full color throughout Careful tutorial approach, by authors who are award-winning educators with strong teaching experience

Over the past 200 years, our knowledge of stars has expanded enormously. From seeing myriad dots of different brightnesses, we moved on to measure distances, temperatures, sizes, chemical compositions, even ages, finding stars that dwarf our Sun and are dwarfed by it, some in their youth, others ancient. First published in 2001, *Extreme Stars* describes the lives of stars from a fascinating perspective. It examines their amazing extremes and results in an engaging overview of stellar evolution, suitable for anyone

## Online Library Xtreme Cut 290 The Right Coolant Makes A Big Difference

interested in viewing or studying stars. Ten chapters, generously illustrated throughout, explain the natures of the brightest, the largest, the hottest, the youngest, and so on, ending with a selection of the strangest stars the Universe has to offer. Taken as a whole, the chapters show how stars develop and die and how each extreme turns into another under the inexorable twin forces of time and gravity.

Summarizes core information for quick reference in the workplace, using tables and checklists wherever possible. Essential reading for safety officers, company managers, engineers, transport personnel, waste disposal personnel, environmental health officers, trainees on industrial training courses and engineering students. This book provides concise and clear explanation and look-up data on

## Online Library Xtreme Cut 290 The Right Coolant Makes A Big Difference

properties, exposure limits, flashpoints, monitoring techniques, personal protection and a host of other parameters and requirements relating to compliance with designated safe practice, control of hazards to people's health and limitation of impact on the environment. The book caters for the multitude of companies, officials and public and private employees who must comply with the regulations governing the use, storage, handling, transport and disposal of hazardous substances. Reference is made throughout to source documents and standards, and a Bibliography provides guidance to sources of wider ranging and more specialized information. Dr Phillip Carson is Safety Liaison and QA Manager at the Unilever Research Laboratory at Port Sunlight. He is a member of the Institution of Occupational Safety and Health, of the Institution of Chemical Engineers' Loss Prevention Panel and of the
